SUMMARY

- Skilled in software development, data analysis, and project management. Demonstrated leadership in academic and group projects.
- Experienced in Agile/Scrum project management. Demonstrated ability to set priorities and meet deadlines.
- Experienced in database management, SQL programming, and optimizing data performance.
- Strong analytical and critical thinking abilities, applied in solving technical challenges and optimizing software solutions.
- Proven ability to work in teams, lead technical projects, and collaborate effectively with peers in academic and professional settings.
- Experienced in full-stack web development with a focus on integrating Angular UIs, building RESTful APIs, and migrating data from JSON to MongoDB for optimized backend performance.

EDUCATION

New York Institute of Technology, New York, NY

Master of Science in Computer Science

August 2021 – August 2024

Parul University, Vadodara, Gujarat, India

Bachelor of Computer Application

June 2018 - June 2021

WORK EXPERIENCE

SHIVAM NETWORKS

Full Stack Developer

May 2023 – February 2024

- Led the development of a full-stack Angular + Node.js task management system, from requirements gathering through deployment, in an Agile environment with 2-week sprints.
- Designed RESTful APIs using Node.js and transitioned backend data handling from static JSON to MongoDB, improving data scalability and query efficiency by 60%.
- Applied object-oriented design principles and implemented optimized algorithms for task prioritization and filtering, enhancing application performance.
- Collaborated with cross-functional teams—including UI/UX designers and testers—to integrate PrimeNG components and deliver a responsive and accessible interface.
- Conducted code reviews, managed version control with Git, and wrote unit and integration tests to ensure code reliability and maintainability.
- Demonstrated effective communication by presenting sprint demos and gathering feedback from internal stakeholders to iterate on core features.

PROJECTS

Online Learning Platform

- Developed a full-stack application using Angular and Node.js, allowing students to enroll in courses and track their learning progress effectively.
- Enabled dynamic interaction between students and instructors through integrated messaging and feedback features, enhancing user engagement.
- Implemented user authentication and role-based access control, ensuring secure access for students, instructors, and administrators.

Patient Record System

- Developed a patient record system using MongoDB, organizing patient data for efficient storage and management.

- Designed the database schema to support quick and easy searching of patient records, improving the speed of data retrieval.
- Ensured the database architecture could handle growing amounts of patient data, supporting long-term scalability and performance

Weather App with Alerts

- Developed a weather forecasting application that retrieves real-time weather data using the OpenWeatherMap API and displays temperature, humidity, and wind speed
- Implemented an alert system that notifies users of extreme weather conditions such as storms, heavy rainfall, or heatwaves.
- Designed a user-friendly interface using JavaScript, HTML, and CSS for seamless interaction across devices.
- Integrated geolocation features to automatically detect the user's location and provide personalized weather updates.

SKILLS & STRENGTHS

Technical Skills:

- **Languages & Frameworks:** Java, JavaScript, TypeScript, Python, SQL, Bash, HTML, CSS, Angular, Node.js, Express.js, React
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Tools & Platforms:** Git, Postman, Docker, Azure, Linux, Kubernetes (basic), Kafka (basic)
- **Methodologies:** Agile/Scrum, REST API Development, CI/CD (GitHub Actions, Git)

Strengths:

- Dedicated and self-motivated learner with a strong passion for technology. Possess excellent problem-solving and analytical skills, enabling me to approach complex challenges with innovative solutions. Proven ability to work independently and collaborate effectively in team environments.
- Quick to learn and integrate new technologies and methodologies into existing workflows.

Primary Skills:

- Proficient in front-end (Angular, React, PrimeNG) and back-end (Node.js, Express.js) development, with experience in API creation, MongoDB, SQL, Git, CI/CD pipelines, and basic Docker exposure.
- Familiar with Google Workspace, GCP services, JWT/OAuth for secure access control; actively building expertise in identity management tools like Okta, SSO, MFA, and JAMF
- Experienced in Agile/Scrum environments, participating in sprints, standups, and reviews; strong analytical skills in troubleshooting, optimizing system performance, and delivering scalable solutions.
